WATT min - max | 1 - 10

lumen package | 60 - 930

To imagine the world upside down, the versatility of NANO is also expressed by the counterpart of the in ground version:

NANO downlight is a round ceiling recessed luminaire and if installed in a sequence, it can easily transform an arcade or a patio in a celestial vault.

As a star in the milky way, this little fixture which is unnoticeable during the day, can create a perfect scenario for any kind of outdoor installation.

HYDROQUADRO NANO

Main features of the NANO range are the anti glare screen and the anti corrosion trim which are very important as they are positioned outdoor, in ground.

Each unit can incorporate a standard anti glare screen for a good combination of glare control and light output or a super comfort anti glare screen to reduce glare and light beam for a minimal loss of the light effect.

They are made by an hard adonized black aluminium body and have a trim of stainless steel AISI 316 L.

Not simple accessories but real allies
for your lighting project.
Reveal the existing and leave
your lightmark in every project.
